Hi Delia,

I'm doing a comparison of addresses with WRIMS and BOE and found that the addresses for the applications and statements for Nevada Irrigation District do not match. I spoke with a lady from BOE and found out that the address they have is more recent than that in WRIMS. Please update the following filings (I know there's a lot so please feel free to spread it out with other staff):

CONTACT REPORT

DATE: 7/27/2007

SUBJECT: Nevada Irrigation District (MULTIPLE APPLICATIONS/STATEMENTS)

DIVISION PERSONNEL: Rhea Lucina

INDIVIDUAL/AGENCY CONTACTED: Eureka (from BOE)

PHONE: (916) 327-7283

CONVERSATION DESCRIPTION: I asked if BOE received any new address information from Nevada Irrigation District to cause an address discrepancy between WRIMS and BOE. She stated on 12/26/07, there was a note made in their database from Lynne Bowling stating that the address is being changed from PO Box 1019 to 1036 W Main Street, Grass Valley, CA 95945. WRIMS was never updated with the new address.

DECISION(S): WRIMS needs to be updated with the current mailing address: 1036 W Main Street, Grass Valley, CA 95945.

ACTIONS TAKEN: Email DMU with information to update the relating applications/statements on WRIMS.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
